Hi, I have been using satellite radio for many months now (almost 18 months) and have been very pleased to find such a wonderful avenue of information available to all people. While there are no news/traffic stations for my home town, I find it incredibly entertaining on listening to information about other cities across the nation where I have friends.

I do not believe that there is any justification in stopping XM radio from providing these channels as the time I spend listening to them would go 100% back into other XM stations were they removed. Most of the other channels I listen to have no commercials whatsoever.

Please reject 4-160 and keep my road time as enjoyable as possible.
